SuperEX EX550

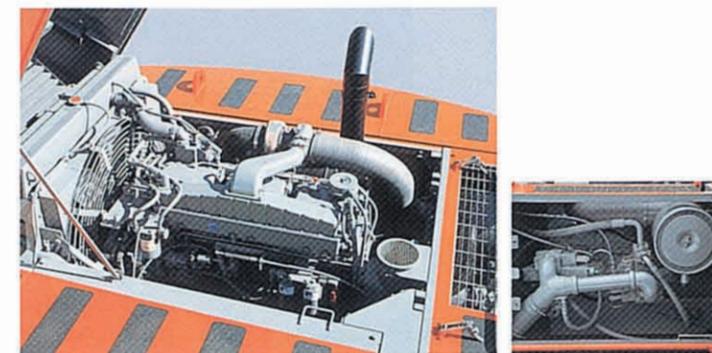

The Hitachi big EX550 and EX600H hydraulic excavators are packed with many requested features — productivity, ruggedness, operator comfort, maintainability and environmental protection awareness.

Big, Rugged Body Gives Power and Speed When Needed at Tough Job Sites.

Fuel-efficient 370 PS (361 HP) direct injection turbo engine and high-pressure pump yield big production and achieve low fuel consumption.

E-P Control for Bigger Production
The job-proven E-P (Engine-Pump) control delivers power and speed to suit job requirements. Auto Idle is provided for energy savings when idling.

Emissions Control Engine

The engine is designed to reduce pollutants (hydrocarbons, carbon monoxide and nitrogen oxides) in gas emissions for environmental protection, conforming to the Emission Standards in Japan and USA.

The machine shown on this catalog is positioned for advertising purpose. Be sure to lower the front attachment onto the ground when you leave the machine, with safety in mind.

Curved Monitor

The monitor is ergonomically curved for easy reading. Touch-control resin-molded switches seal out dirt.

Advanced Four Work Mode Selector

The operator can choose from the four work modes — general purpose mode, trenching mode, grading mode and precision mode — according to job needs.

Quick Response to Lever Control

Up-down movement of the boom is well matched with lever inching control. This brings productivity to tamping in civil engineering works and land grading projects. Power Boost yields power surges, when needed, at the touch of a finger.

● **Comfortable Shock-dampening Ride**

Six-point cab support mount (on standard cab) effectively dampens shocks and vibration. Six seat adjustments — including seat tilt angle and height adjustments — help the operator to find the most comfortable operating position. This advanced suspension seat enhances riding comfort.

Cab support types:

Six-point support type on standard cab.

Eight-point support type on pressurized cab with integrated headguard (H cab).

Seat Belt

① **Large-sized reinforced rearview mirror** is utilized for improved rear viewing.

② **Emergency evacuation hammer** is provided in the cab for getting out of the cab in the case of an emergency.

③ **Fresh air type air conditioner and hot-and-cool box** are available optionally.

① **Side walk as well as non-slip tapes and handrails** are provided for convenience of maintenance and inspection.

● **Engine cover with damper** can be fully opened, giving easy access to the engine for easy maintenance and inspection.

② **Ample utility space and large tool box** are provided to hold consumables and fuel can.

③ **Cartridge type fuel filter, engine oil filter and bypass filters** are provided for simple maintenance from the ground.

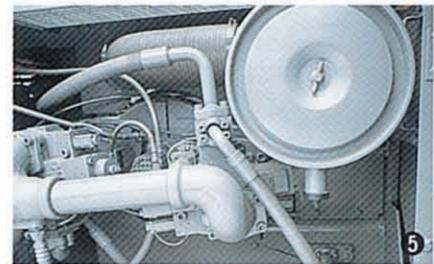

Hitach's Design Advances Stay Ahead.

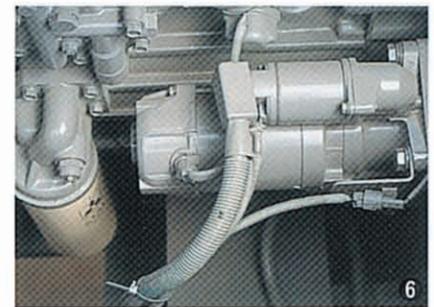

① **Interlocking mounting side cutters** (hoe bucket) prevent the bucket side plates from wear, increasing durability.

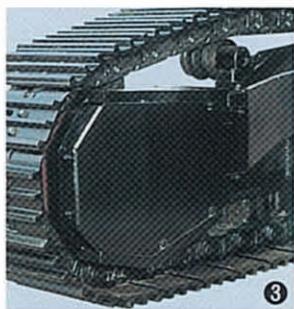

② **Bucket link A** is cast monolithically to resist torsion for added durability.

⑤ **Bulkhead** is provided between pump and engine.

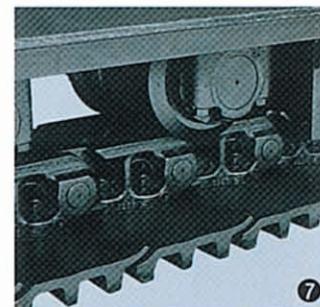

⑥ **Heat-resistant split-type wire harnesses** are employed for added durability and reliability.

③ **Travel motor cover** protects the travel motor from damage. Piping is housed inside the track frame for protection against impacts. Also, an ample 810 mm (2'8") ground clearance enhances mobility on rough terrain, improving durability.

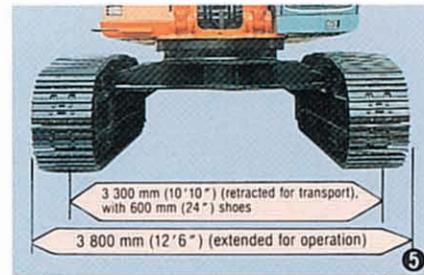

④ **Three engine cover locks** hold the engine cover securely, reducing its jolt.

⑦ **Large track links** are fitted with struts for added durability. Pin seal prevents dirt entry and reduces internal wear.

④ **Electric grease gun with hose reel (optional)** enhances easy lubrication without need for repositioning of the machine. Front attachment and swing circle can be remote lubricated.

⑤ **Retractable track frames (LC type)** can be extended for higher stability at work, and retracted for convenience of transport.

Overall undercarriage width:
3 800 mm (12'6"), with 600 mm (24") shoes

Overall undercarriage length:
5 680 mm (18'8")

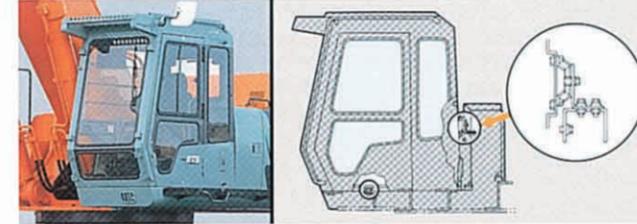

SuperEX EX600H

D esigned for Tough Operation with Numerous Rugged Body Design Features.

Bucket link A is cast monolithically to resist torsion for added durability.

Damage prevention plate and square bars are provided at the bottom of the arm for protection against damage due to rocks caught during excavation.

Increased Bucket Capacity
2.47 m³ rock bucket are provided for the H version as standard equipment.

The pressurized cab with integrated headguard protects the operator from falling objects. Eight-point bed support mount effectively dampens shocks and increases durability. The cab is pressurized to prevent dirt entry.

Emergency Evacuation Window

Rear window of the cab serves as an emergency exit for getting out of the cab.

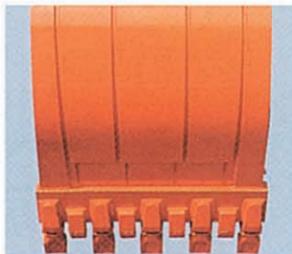

Cab front guard and sunvisor are optionally available for the pressurized cab with integrated headguard.

Strengthened Undercover

Thickened undercover at the bottom of the upperstructure protects hydraulic equipment from damage due to obstructions during travel.

Thickened Bucket Bottom Plates

Wear plate is doubled at the bucket bottom for increased wear resistance.

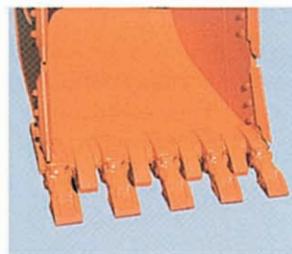

Big bucket teeth are utilized for rock excavation to prevent disengagement and increase wear resistance.

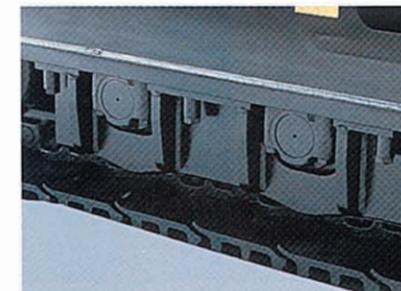

Strengthened Side Shrouds

Two side shrouds on each side are provided to reduce wear of bucket side plates.

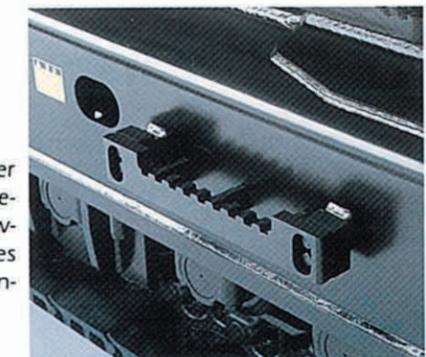

Cutting edge shrouds are thickened to increase wear resistance.

Track Guard

Large-sized track guard, extending over three lower rollers on each side, prevents disengagement and protects lower rollers. Also, bolted design eases replacement. Full track guard is optionally available.

Strengthened side steps are provided to resist deformation.
