SuperEX EX400

The Hitachi big EX400 and EX450H hydraulic excavators are packed with many requested features — productivity, ruggedness, operator comfort, maintainability and environmental protection awareness.

Big, Rugged Body Gives Power and Speed When Needed at Tough Job Sites.

Quick Response to Lever Control

Up-down movement of the boom is well matched with lever inching control. This brings productivity to tamping in civil engineering works and land grading projects. Power Boost yields power surges, when needed, at the touch of a finger.

Emissions Control Engine

The engine is designed to reduce pollutants (hydrocarbons, carbon monoxide and nitrogen oxides) in gas emissions for environmental protection, conforming to the Emission Standards in Japan and USA.

Advanced Four Work Mode Selector

The operator can choose from the four work modes — general purpose mode, trenching mode, grading mode and precision mode — according to job needs.

Curved Monitor

The monitor is ergonomically curved for easy reading. Touch-control resin-molded switches seal out dirt.

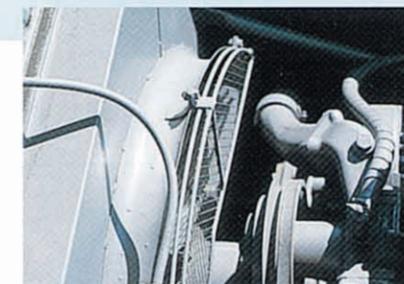

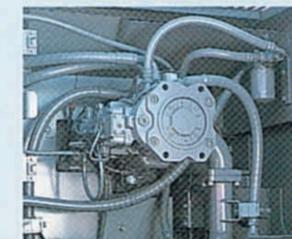

Fuel-efficient 300 PS (296 HP) direct injection turbo engine and high-pressure pump yield big production and achieve low fuel consumption.

E-P Control for Bigger Production

The job-proven E-P (Engine-Pump) control delivers power and speed to suit job requirements. Auto Idle is provided for energy savings when idling.

Noise Suppression

Bell-mouth fan shroud and large-capacity muffler successfully reduce air blowing noise and turbulence noise.

Noise levels:

73 dB (A) at operator's ear in cab
78 dB (A) at 7 m (2'4") away

The machine shown on this catalog is positioned for advertising purpose. Be sure to lower the front attachment onto the ground when you leave the machine, with safety in mind.

● **Comfortable Shock-dampening Ride**

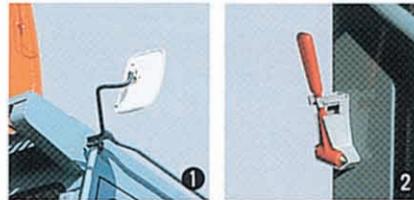

Six-point cab support mount effectively dampens shocks and vibration. Six seat adjustments — including seat tilt angle and height adjustments — help the operator to find the most comfortable operating position. This advanced suspension seat enhances riding comfort.

Cab support types:

Six-point support type on standard cab.
Eight-point support type on pressurized cab with integrated headguard (H cab).

Seat Belt

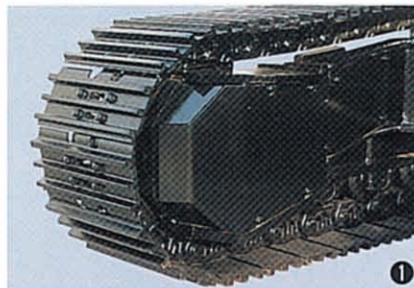

① **Side mirror** is added on the cab side for quick rear viewing.

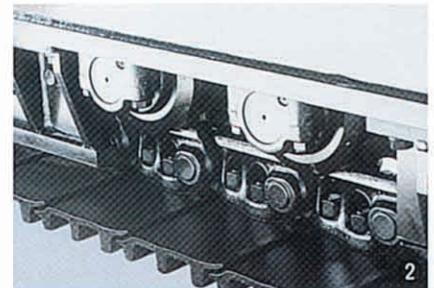

② **Emergency evacuation hammer** is provided in the cab for getting out of the cab in the case of an emergency.

③ **Fresh air type air conditioner and hot-and-cool box** are available optionally.

① **Travel motor cover** protects the travel motor from damage. Piping is housed inside the track frame for protection against impacts.

② **Large track links** are fitted with struts for added durability. Pin seal prevents dirt entry and reduces internal wear.

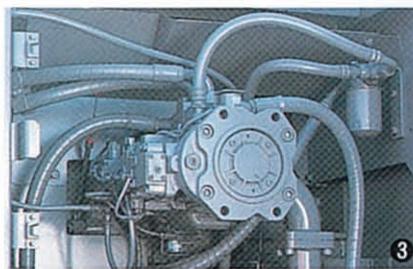

Hitachi's Design Advances Stay Ahead.

1 Engine cover with damper can be fully opened, giving easy access to the engine for easy maintenance and inspection.

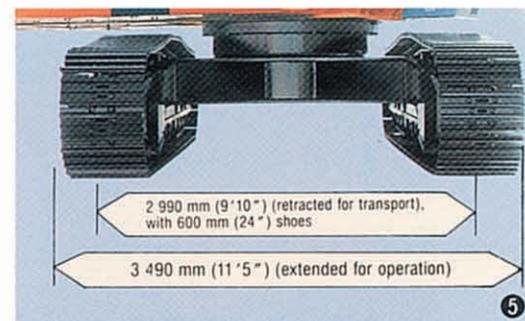

2 Side walk as well as non-slip tapes and handrails are provided for convenience of maintenance and inspection.

3 Bulkhead is provided between pump and engine.

4 Electric grease gun with hose reel (optional) enhances easy lubrication without need for repositioning of the machine. Front attachment and swing circle can be remote lubricated.

5 Retractable track frames (LC type) can be extended for higher stability at work, and retracted for convenience of transport.

Overall undercarriage width:
3 490 mm (11'5") w/ 600 mm (24") shoes

Overall undercarriage length:
5 470 mm (17'11")

3 Bucket link A is cast monolithically to resist torsion for added durability.

4 Interlocking mounting side cutters prevent the bucket side plates from wear, increasing durability.

SuperEX EX450H

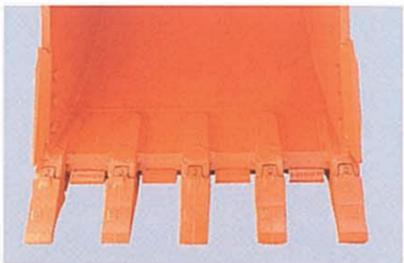

Thickened Bucket Bottom Plates
Wear plate is doubled at the bucket bottom for increased wear resistance.

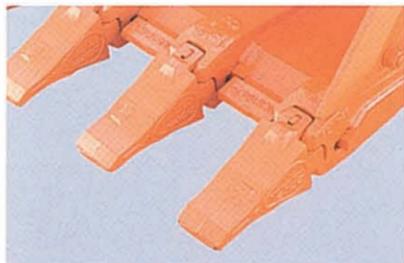

Damage prevention plate and square bars are provided at the bottom of the arm for protection against damage due to rocks caught during excavation.

Strengthened Side Shrouds
Side shrouds are enlarged and strengthened to reduce wear of bucket side plates.

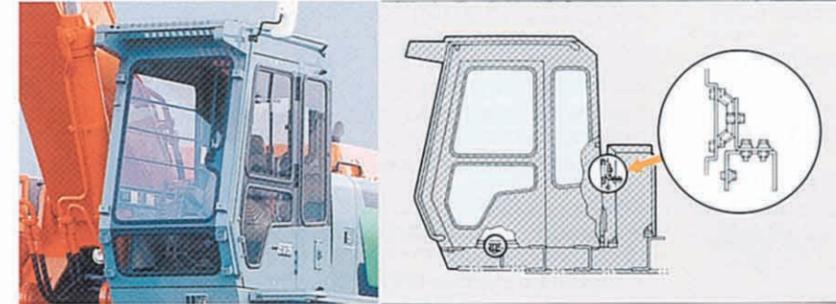

Cutting edge shrouds are thickened to increase wear resistance.

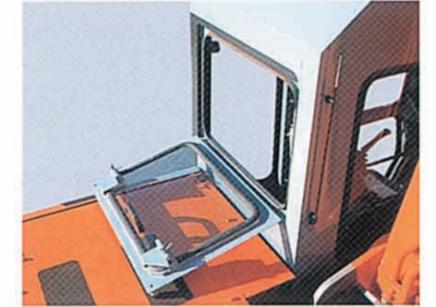

Big bucket teeth are utilized for rock excavation to prevent disengagement and increase wear resistance.

D esigned for Tough Operation with Numerous Rugged Body Design Features.

The pressurized cab with integrated headguard protects the operator from falling objects. Eight-point bed support mount effectively dampens shocks and increases durability. The cab is pressurized to prevent dirt entry.

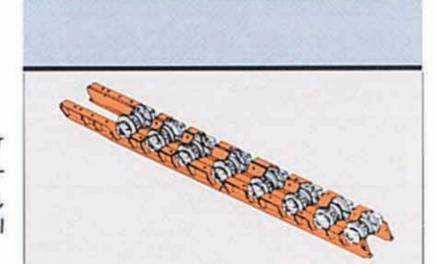

Emergency Evacuation Window
Rear window of the cab serves as an emergency exit for getting out of the cab.

Cab front guard and sunvisor are optionally available for the pressurized cab with integrated headguard.

Strengthened Undercover
Thickened undercover at the bottom of the upperstructure protects hydraulic equipment from damage due to obstructions during travel.

Track Guard
Large-sized track guard, extending over three lower rollers, prevents disengagement and protects lower rollers. Also, bolted design eases replacement. Full track guard is optionally available.

BACKHOE ATTACHMENTS

Boom and arms of all-welded, box-section design. 7.0 m (23'0") boom, 2.9 m (9'6"), 3.4 m (11'2"), 3.9 m (12'10") and 4.9 m (16'1") arms are available. Bucket is of all-welded, high-strength steel structure. Side clearance adjust mechanism provided on the bucket joint bracket.

EX400H-3c/EX400LCH-3c: The EX450H-3c and EX450LCH-3c are heavy-duty type featuring the reinforced H-boom and H-arm, and 1.82 m³ (2.38 yd³; PCSA heaped) rock bucket.

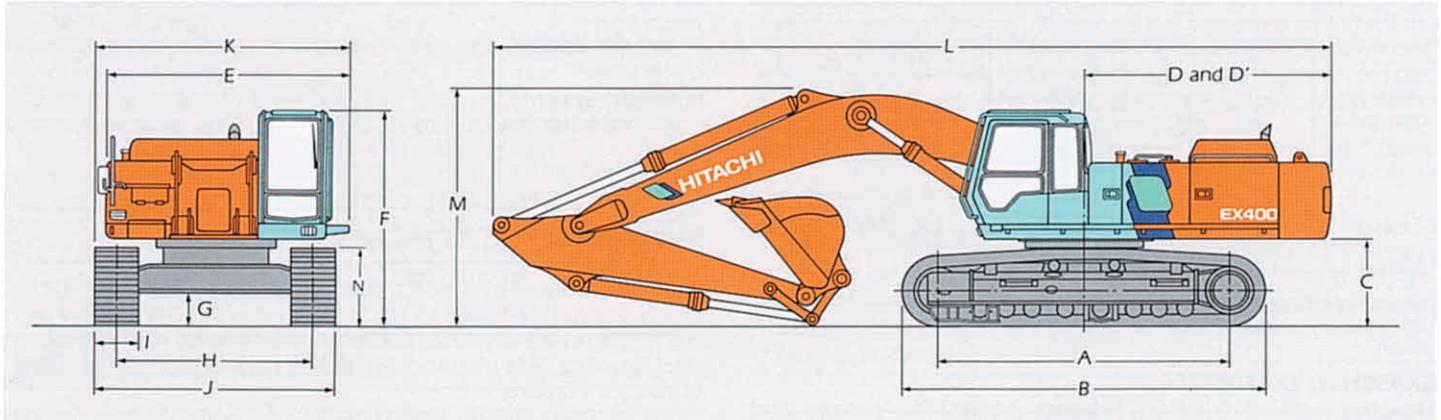

LOADING SHOVEL ATTACHMENTS

Boom and arm are of all-welded, low-stress full-box section design. Efficient, automatic horizontal crowding achieved by one-lever control because the parallel link mechanism keeps the bucket digging angle constant, and the level cylinder circuit maintains the bucket height constant.

 2. Lifting capacity of the Super EX Series does not exceed 75% of tipping load with the machine on firm, level ground or 87% of full hydraulic capacity.
 3. The load point is a hook (not standard equipment) loaded on the back of the bucket.
 4. *Indicates load limited by hydraulic capacity.
