Precedent-Setting Performance in an Intelligent Excavator

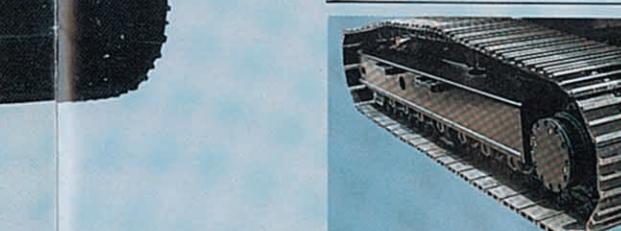

EX270

The EX270 tames big tasks with the total balanced performance and time-tested durability you expect from Hitachi. The tough machine is gentle with amenities that both pamper and protect the operator. And the ETS provides superior work performance with less fuel consumption.

EX270

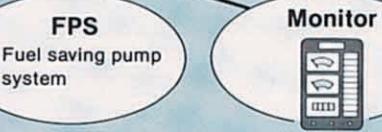

High Mobility and Durability
The EX270 has a high-pressure, 2-speed travel system for high traction force and travel speeds.
Travel speed:
High: 4.6 km/h (2.9 mph)
Low: 3.7 km/h (2.3 mph)
In both speed ranges, traction

force remains consistent. The tough tractor-type undercarriage, with X-form center frame, assures superb durability and mobility. Sealed pin track links, with center struts, upgrade durability.

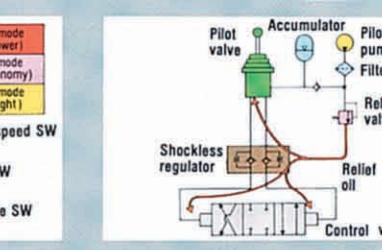

E-P Control
• Mode selection
• Two-speed travel
• Auto-idling
• Low noise

OHS
• Independent & combined operations

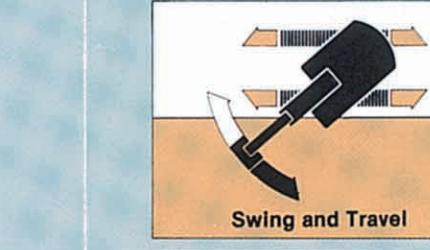

FPS
• Fuel saving pump system

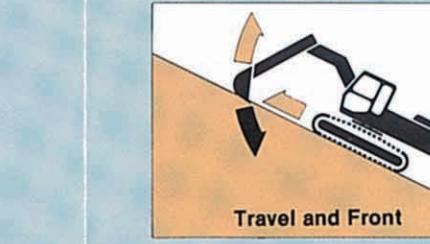

Mode Selection
Hitachi's E-P Control (computer-aided Engine-Pump Control) system gives 3-mode selection. A microcomputer automatically controls engine and hydraulic output for maximum productivity and fuel savings.

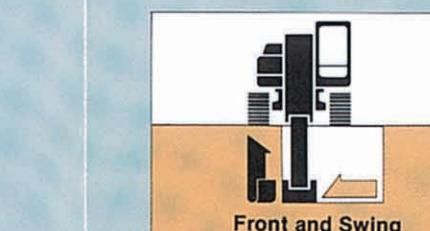

Pilot Control and Comfort
The advanced OHS (Optimum Hydraulic System) provides a high degree of independence. This enables quick and smooth combined operations.

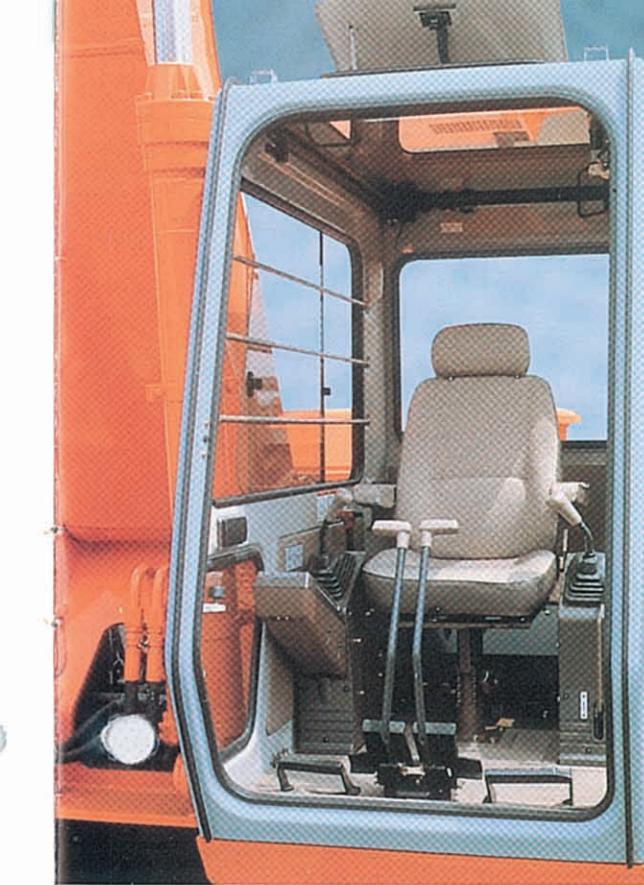

Simultaneous swing and straight-line travel are made easy by the OHS which overcomes the natural machine tendency to curve during combined operations. This makes pipe positioning and laying faster and safer.

Simultaneous straight-line travel and boom/arm/bucket operations are simple. The OHS overcomes curving during steep slope climbing, getting out of marshes and machine transport loading/unloading.

Simultaneous swing and boom/arm/bucket operation enhances loading capabilities and vertical trench wall digging ease. Swing speed remains stable during controlled front operations.

Advanced Cab
The cab is totally human engineered to meet ISO standards. All-pressed, fully-independent rubber mounted construction achieves a quiet 70 dB (A) (E-mode) noise level. The large bronze reinforced glass area assures good all-round visibility. Windows open wide to provide plenty of refreshing ventilation.

Versatile Control Ease
Convenient tilt-type control levers feature a 110 mm (4.3") adjustment range. The adjustable reclining seat has arm rests for additional support. The optional quick coupler enables speedy modification of control lever functions to other configurations.

Monitoring/Alarm System
The monitoring/alarm system can be easily read from the operator seat. The operator can check machine conditions at a glance.

Hitachi's Total Control for Maximizing Performance

- Cross-Sensing Summation System makes maximum use of available engine output.
- Arm and boom merge circuits shorten cycle times.
- Extra port enables use of the two main pumps to power special attachments such as a concrete crusher.
- Longer Intervals between oil and filter changes.
- Parking brake activates automatically when the travel and swing levers are in neutral.
- Travel motors are in-shoe type. Undercovers on the upperstructure prevent damage from external obstructions.
- Pilot-control shutoff lever to avoid misoperation when getting in and out of the cab.
- Full-open machine covers, including radiator cover. A torsion bar facilitates easy engine cover opening.
- Adjustable bucket pin bracket with dirt seals.
- Centralized lubrication system on elevated points.
- Lifetime-lubricated track rollers, idlers and sprockets.
- Stroke-end cushion mechanisms are built into the cylinders.
- ORS (O-ring Seal) and TIG (Tungsten Inert Gas) welding ensure hydraulic line reliability.
- Reinforced D-section frame protects upperstructure covers.
